**Safer Society**

> "There are two kinds of people in prison: those who should never have been sent there, and those who should never be let out."
> (George Bernard Shaw)

Non- Functional | **Soft Goal**
fair judgments in criminal proceedings

Functional | **Hard Goal**
Reduce Recidivism among criminal offenders

AND

HUMAN | **MACHINE**

Mandatory or optional? Threshold?

Overcome human deficiencies

Overcome machine deficiencies

Ensure consistent performance over time

Explainable decisions

Ensure unbiased decisions

Legal Environment

Zeitgeist

Ensure determinism

Adequate Monitoring

DATA & TRAINING

Ensure available Comprehensive Case Information

Adequate Data | **Functional**

Unbiased Training Data | **Non- Functional**

Perspectives on Implementation

- Dashboard
- Committee (e.g., 2 humans, 1 AI) & voting

Assumptions to discuss:

-exclude or include forensic and mentally ill offenders?

- we do not aim for "predictive policing"

"monitoring": if we monitor we infuence the procedure. Monitor case or overall judge performance? Parallels to teaching evaluations.

- who will be responsible and/or accountable for the decision?

- how to deal with crime? maximal punishment vs. early reintegration of the offender
